4 - 9 APRIL 2020
ARRÁBIDA / AZEITÃO

The purpose of this retreat is to help us to go deeper into a real experience of our existence by connecting us with the whole and with life, return to the origins of Ayni.

With the complement of various medicinal and therapeutic practices, we wish each participant to get closer towards its destiny and life mission.

If we (re)-connect with our true essence without any masks or illusions, we may be freed from the denser energies that do not allow us to fulfill and reach the feeling of fullness.

The purpose to fulfill the greatest goal of the human being : be happy with awareness.

Tobacco is used and spread by many communities, tribes and civilizations throughout the earth as a plant with deep entheogenic, psychedelic and medicinal properties.

The medicine is used to deepen the connection to the Great Spirit and helps with the opening of the vision and prepares body, mind and spirit to receive positive energy.

This plant has a healing power and opens the path of learning and awakens the divine that exists in each of us.

It results in the clearing of records, relationship patterns, energetic and spiritual blockages that influence the conduct and routine of our daily lives.
